

A schematic diagram illustrating a growth cycle. The vertical axis is labeled "GROWTH/CYCLE" with an upward arrow, and the horizontal axis is labeled "TEMPERATURE" with a rightward arrow. A horizontal dashed line represents the "1 MONO LAYER" state. Two vertical dashed lines mark transitions. Between the first transition, two lines labeled  $L_1$  and  $L_2$  diverge from the 1 MONO LAYER line. Between the second transition, two lines labeled  $H_1$  and  $H_2$  diverge from the 1 MONO LAYER line. The region between the transitions is labeled "W".
